Shyam,

One of the responses from PANYNJ to a question regarding the WTC Smoke Management systems referred to contract WTC 499.18. The investigators from Hughes Associates, Inc. would like to obtain a copy of this contract. The document is not among those in the NIST repository. The question and answer are contained below. We would greatly appreciate any help in locating this document.

> 2. Was the smoke control sequence/operation described in the, "World Trade Center Operation and Maintenance of HVAC System Towers A&B (1987)" [WTCI-129-P] ever revised/revisited prior to September 11, 2001 or does this document accurately described the smoke control sequence/operation in place on September 11, 2001? If the WTCI-129-P documented has been revised/revisited, where can these revisions be located? *Big Blue remote control to control all fans and smoke purge was installed after 87, unknown if ever written up. I think the contract was WTC 499.18.*

Thanks,
Stuart
